INTRODUCING DATUM S

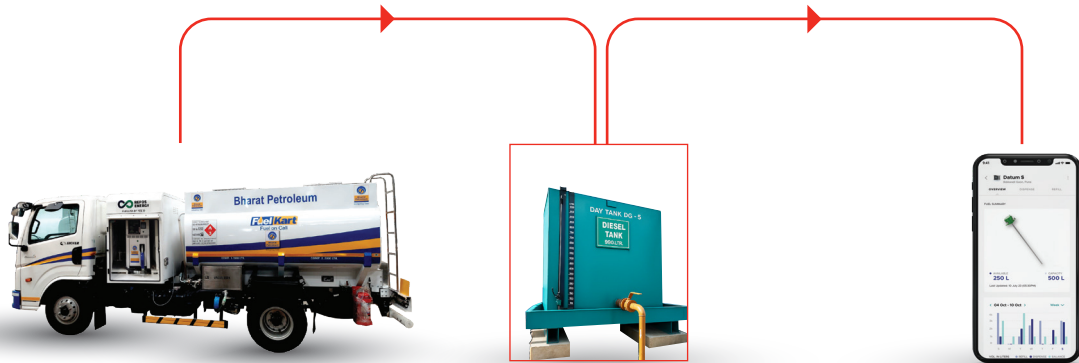

Datum S is a pioneering combination of a Fuel Level Sensor and IoT controller, delivering advanced solutions for accurate liquid fuel measurement across various industries. This versatile sensor ensures precise measurements and seamless data transmission to external IoT devices. Using capacitive sensing technology, enabling precise readings and ensures smooth data transfer.

What We Offer:

	Innovative Fuel Monitoring: Datum S is a Legal Metrology compliant solution in India.
	Real-Time Data: Enables continuous monitoring of fuel levels and consumption across storage types.
	Enhanced Efficiency: Automates data collection with IoT technology, reducing errors and boosting operational efficiency.

Key Features:

- 99% 99% Accuracy with Capacitive Sensing Technology
- Easy Setup and Installation
- Flameproof Protection and High Sampling Rate
- Intrinsic Safety Barrier Integration and Rugged Design
- Built-in Electronics Module and Modular Length
- Legal Metrology Compliant
- Retro fitment in day tank
- Suitable for upto 4 gensets
